

Assessed Coursework

Course Name	Internet Technology (M)		
Coursework Number	4 (of 6) – Design Specification		
Deadline	Time: 4.30pm	Date: 12 February 2026	
% Contribution to final course mark	15	This should take at most these many hours:	5
Solo or Group ✓	Solo	Group	✓
Submission Instructions	Via Moodle – see Page 2		
Who Will Mark This? ✓	Lecturer ✓	Tutor ✓	Other
Feedback Type? ✓	Written ✓	Oral	Both
Individual or Generic? ✓	Generic	Individual ✓	Both
Other Feedback Notes			
Please Note: This Coursework cannot be Re-Done			

Code of Assessment Rules for Coursework Submission

Deadlines for the submission of coursework which is to be formally assessed will be published in course documentation, and work which is submitted later than the deadline will be subject to penalty as set out below. The primary grade and secondary band awarded for coursework which is submitted after the published deadline will be calculated as follows:

- (i) in respect of work submitted not more than five working days after the deadline
 - a. the work will be assessed in the usual way;
 - b. the primary grade and secondary band so determined will then be reduced by two secondary bands for each working day (or part of a working day) the work was submitted late.
- (ii) work submitted more than five working days after the deadline will be awarded Grade H.

Penalties for late submission of coursework will not be imposed if good cause is established for the late submission. You should submit documents supporting good cause via MyCampus.

Penalty for non-adherence to Submission Instructions is 2
bands

评估作业

课程名称	互联网技术 (M)		
作业编号	4 (共6) — 设计规范		
截止日期	时间: 下午4:30	日期: 2026年2月12日	
% 对最终课程成绩的贡献	15	这应该最多需要这 些小时:	5
个人或小组 ✓	Solo	组	✓
提交说明	通过 Moodle – 见第 2 页		
谁将批改? ✓	讲师 ✓	助教 ✓	其他
反馈类型? ✓	书面 ✓	Oral	Both
个人或通用? ✓	通用	个人 ✓	Both
其他反馈备注			
请注意: 此课程作业不能重做			

课程作业提交的评估规则

正式评估的课程作业提交截止日期将公布在课程资料中, 逾期提交的作业将按以下规定处罚。在公布截止日期后提交的课程作业, 其主成绩和次要等级将按以下方式计算:

- (i) 对于在截止日期后不超过五个工作日提交的作业
 - a. 该作业将按常规方式评估;
 - b. 该主要等级和已确定的次级波段将随后为每个工作日减少两个次级波段 (或一天工作的一部分) 工作提交晚了。
- (ii) 截止日期后提交超过五个工作日的作品将被评定为H级。
逾期提交的处罚 bmission of coursewor k will not be i_mpose d if good 原因 is esta blished for the l提交申请。你应该提交通过MyCampus提交支持正当理由的文件。

不遵守提交说明的处罚是2
分

Marking Criteria
See Page 5

评分标准
见第5页

Design Specification (15%)

1. Introduction

Your group should come up with a web application to develop. Let your imagination fly but be practical! We will mainly mark the quality of the design and implementation and only reserve very few marks for the novelty of the idea.

The application you design needs to:

- involve user authentication;
- interact with some kind of model stored in a database;
- be visually appealing and have an intuitive user interface;
- allow the user to input something which is then used in some way by the application.
- overall, the functionality supported should be rich enough in order to allow you to demonstrate an understanding of the technologies covered in this course.

Having discussed your ideas within your team, you are required to come up with a Design Specification, which will provide a whole range of details regarding the design of the web application that you intend to implement. This will include an overview, a specification, system architecture diagram, ER diagram, site map, and wireframes.

The Design Specification is worth 15% of the overall assessment of the course and is due in by **12 February at 4.30pm**. One submission per team is required.

2. What should be included in the submission

Imagine that you are submitting your idea to get funding – so you have to prepare a Powerpoint presentation to describe:

1. An **overview** of the application (i.e., what it does and why it is useful) – 1 slide.
Your overview should clearly state the intended users, the problem the application addresses, and the value it provides.
2. The **specification** as prioritised user stories (MoSCoW) – 1 slide.
Your specification should provide 6-10 user stories in the form: “As a..., I want..., so that...” and label each story as Must / Should / Could / Won’t (e.g. M1, M2, ..., S1, S2, ...).
Your set of Must requirements must include user authentication, interaction with a database-backed model, and at least one case where the user inputs data which is saved and used by the application.
3. A high-level **system architecture diagram** – 1 slide.
This diagram should show the main components of your system, and any external APIs/services (if applicable).
4. An **ER Diagram** (in compressed Chen notation), along with a description of the attributes in each entity – 2 slides max.
The model should be clearly relevant to your specification and should reflect relationships and constraints appropriately.
5. A **site map** showing the site organisation – 1 slide.
You must also label pages with the Must requirements they support.
6. A number of **wireframes** to show the main functionality of the system – at least 2 and at most 5 slides.
Your wireframes should illustrate the user interface for the core functionality of the system and must cover all Must requirements.

设计规范 (15%)

1. 简介

你的小组需要开发一个网络应用程序。尽情发挥想象力但要务实！我们将主要评估设计和实现的品质，仅对创意的新颖性保留少量分数。

你设计的应用程序需要：

- 涉及用户认证；
- 与存储在数据库中的某种模型交互；
- 要具有视觉吸引力，并拥有直观的用户界面；
- 允许用户输入某些内容，这些内容随后将被应用程序以某种方式使用。
- 总的来说，所支持的功能应该足够丰富，以便能够展示你对本课程所涵盖技术的理解。

在团队内部讨论了你的想法后，你需要提出一份设计规范，该规范将提供有关你打算实现的Web应用程序设计的广泛细节。这将包括概述、规范、系统架构图、ER图、站点地图和线框图。

设计规范占课程总成绩的15%，截止日期为2月12日下午4:30。每个团队只需提交一份。

2. 提交内容应包括什么

想象一下，你要提交你的想法来获取资金——所以你必须准备一份PowerPoint演示文稿来描述：

1. 应用程序概述（即，它做什么以及为什么有用）——1张幻灯片。
您的概述应明确说明目标用户、应用程序解决的问题以及它提供的价值。
2. 规范作为优先级用户故事（MoSCoW）——1张幻灯片。
您的规范应提供6-10个用户故事，形式为“作为一个...，我想...，以便...”，并将每个故事标记为必须/应该/可以/不会（例如M1、M2、...、S1、S2、...）。
您的必须要求集必须包括用户身份验证、与数据库后端模型的交互，以及至少一个用户输入数据并由应用程序保存和使用的案例。
3. 高级系统架构图——1张幻灯片。
该图表应展示您系统的主要组件，以及任何适用的外部API/服务。
4. 一份ER图表（使用压缩Chen符号表示），以及每个实体的属性描述——最多2张幻灯片。
该模型应与您的规范清晰相关，并适当反映关系和约束。
5. 一份展示网站组织的站点地图——1张幻灯片。
您还必须标注支持其必须需求的页面。
6. 若干线框图，展示系统的主要功能——至少2张幻灯片，最多5张。
您的线框图应展示系统核心功能的用户界面，并且必须涵盖所有必须要求。

7. An **accessibility plan** – 1 slide.

Your plan should list five web content accessibility guidelines ([WCAG 2.2](#)) you will consider in your design, with a short phrase describing what it means for your web application. Your five criteria may relate to keyboard/focus, forms/errors, structure/navigation, colour/contrast, feedback/status messages.

Appendix – 1 slide. Your appendix should specify **each team member's contribution** to this coursework (in %) and what they contributed to it. Your appendix should also include your **AI use statement**.

3. Working in a team

You should think about how the tasks associated with the design of your team's web app should be divided. Try to ensure that activities are assigned so that every member of the team can be involved at all times.

Please note that under normal circumstances all members in a team will be assigned the same mark.

Teamwork is an important part of software development: in industry, large software development tasks are constantly being undertaken in teams that can vary in size from two to several hundred. In any team it is recognised that people will contribute in different ways. It is important to ensure that you are always aware of your role and that you have an opportunity to make a meaningful contribution to the project at all times.

All members of a team will usually receive the same mark. Where members of a team find the contribution of other members to be unsatisfactory, you are encouraged to resolve the issue internally by negotiation first. However, if this is not possible, the course coordinator should be asked to intervene as soon as possible.

The mark awarded to individual members of the team may be adjusted to reflect the individual's contribution (i.e. if you do not contribute at all, your group coursework mark will be set to 0). **We will be using Deltas as a way of adjusting the team mark in order to arrive at an individual's mark for the team-based components of the course (Design Specification, Presentation and Project).**

Each member of a team will be required to submit a form, giving their own as well as their team members' contributions. A Delta typically adjusts the team mark up or down by 0 or more bands for a given individual according to the contribution. The computation of these Deltas will be informed by the percentage scores that each member of the team will provide, which gives a numerical estimate of the proportion of the overall effort undertaken by each person (including themselves). We will also look at the contributions listed in the appendix to validate any adjustments.

4. Generative AI (GenAI) use in this assessment

You may use Generative AI (e.g., ChatGPT, Copilot, Gemini) to support your work. However, if you use GenAI for anything beyond general background reading, you must **acknowledge how you used it** and **attribute it appropriately**. You remain responsible for the accuracy and originality of our submission.

7. 一份无障碍计划——1张幻灯片。

你的计划应列出你在设计中将考虑五个网络内容无障碍指南 ([WCAG 2.2](#))，并用简短短语说明这对你的网络应用意味着什么。你的五个标准可能与键盘/焦点、表单/错误、结构/导航、颜色/对比度、反馈/状态消息相关。

附录——1张幻灯片。你的附录应明确每位团队成员对此课程作业的贡献（以百分比表示）以及他们具体贡献了什么。你的附录还应包括你的AI使用声明。

3. 团队协作

你应该考虑如何将与你团队网络应用设计相关的任务分配。尽量确保活动分配能让团队成员始终参与其中。

请注意，在正常情况下，团队成员都将获得相同的评分。

团队协作是软件开发的重要组成部分：在行业里，大型软件开发任务通常由规模从两人到数百人的团队承担。在任何团队中，人们都以不同的方式做出贡献。重要的是要确保你始终了解自己的角色，并且有机会随时为项目做出有意义的贡献。

团队成员通常会获得相同的评分。如果团队成员认为其他成员的贡献不令人满意，鼓励首先通过协商内部解决该问题。但是，如果无法这样做，应尽快请求课程协调员介入。

团队个别成员获得的评分可能会根据其贡献进行调整（即如果你完全不贡献，你的团队课程作业评分将被设置为0）。我们将使用Delta作为调整团队评分的方式，以确定课程基于团队组件（设计规范、演示和项目）的个别评分。

每个团队成员都需要提交一份表格，说明他们自己的以及他们团队成员的贡献。Delta通常会根据贡献将团队评分向上或向下调整0个或更多档位。这些Delta的计算将基于团队成员提供的百分比分数，这些分数给出了每个人（包括他们自己）所付出的总体努力比例的数值估计。我们还将查看附录中列出的贡献，以验证任何调整。

4. 本次评估中的生成式人工智能（GenAI）应用

你可以使用生成式人工智能（例如ChatGPT、Copilot、Gemini）来辅助你的工作。但是，如果你使用生成式人工智能做任何超出一般背景阅读的事情，你必须说明你如何使用它，并恰当地进行归因。你仍然对我们的提交内容的准确性和原创性负责。

When you must acknowledge GenAI use

If you use GenAI to generate content that influences your submission (e.g., app ideas, user stories, WCAG criteria choices, diagram structure, slide wording), you must include an **AI Use Statement** (see below). Where GenAI provides specific claims or facts, you should verify them using reliable sources.

Examples

- Brainstorming**
You ask GenAI to suggest app ideas or features (e.g., “Suggest web app ideas suitable for this course” or “Generate possible user stories for a habit tracker”). You should acknowledge that GenAI was used for brainstorming and briefly describe what you took from it.
- Drafting or refining user stories / wording**
You ask GenAI to rewrite user stories, improve clarity, or propose MoSCoW priorities. You should acknowledge GenAI use and ensure the final stories reflect our intent and course scope.
- Selecting accessibility criteria**
You ask GenAI to propose WCAG 2.2 success criteria relevant to your app. You should acknowledge this and ensure the criteria listed are correct and relevant (you should still consult the WCAG Quick Reference directly).
- Generating diagrams or structure**
You ask GenAI to propose an ER model, sitemap structure, or architecture diagram. You should acknowledge the use and ensure the final diagrams are coherent, consistent, and reflect our application accurately.

What is not acceptable

- Submitting GenAI-generated content **without acknowledgement**.
- Including “facts” from GenAI without checking reliability where accuracy matters.
- Presenting GenAI output as if it were an authoritative external source.

The university position is that using GenAI in assessments without acknowledgement may constitute academic misconduct (plagiarism).

AI Use Statement (required if GenAI used beyond background reading)

In your appendix slide, you must include an “**AI Use Statement**” and include any of the following statements that apply:

Declaration on the use of Generative AI:

- We declare that we have not used GenAI in the development of this submission.
- We declare that we have used GenAI as background reading only.
- We declare that we have used GenAI for copy-editing / improving clarity of language.

当您必须承认使用 *GenAI* 时

如果你使用生成式人工智能生成的内容会影响你的提交（例如应用创意、用户故事、WCAG标准选择、图表结构、幻灯片措辞），你必须包含一个人工智能使用声明（见下文）。当生成式人工智能提供具体声明或事实时，你应该使用可靠来源进行核实。

示例

- 头脑风暴**
您要求 GenAI 提出应用程序创意或功能（例如，“为这门课程提出合适的 Web 应用程序创意”或“为习惯追踪器生成可能的使用案例”）。您应该承认使用了 GenAI 进行头脑风暴，并简要说明您从中获得了什么。
- 撰写或完善使用案例/措辞**
您要求 GenAI 重写使用案例、提高清晰度或提出 MoSCoW 优先级。您应该承认使用了 GenAI，并确保最终的使用案例反映了我们的意图和课程范围。
- 选择无障碍标准**
你让 GenAI 提出与你应用相关的 WCAG 2.2 成功标准。你应该承认这一点，并确保列出的标准是正确且相关的（你仍然需要直接查阅 WCAG 快速参考）。
- 生成图表或结构**
你让 GenAI 提出一个 ER 模型、站点地图结构或架构图。你应该承认其使用，并确保最终图表连贯、一致，并准确反映我们的应用。

什么是不被接受的

- 提交未注明出处的 GenAI 生成内容。
- 在准确性至关重要的情况下，未经检查可靠性就包含来自 GenAI 的“事实”。
- 将 GenAI 输出呈现为权威的外部来源。

大学立场是，在评估中使用 GenAI 而未注明出处可能构成学术不端行为（剽窃）。

AI使用声明（如超出背景阅读使用*GenAI*则必须提供）

在你的附录幻灯片中，你必须包含一个“AI使用声明”，并列以下任何适用的声明：

使用生成式人工智能的声明：

- 我们声明，我们未在此次提交的开发中使用 GenAI。
- 我们声明，我们仅将 GenAI 作为背景阅读使用。
- 我们声明，我们使用 GenAI 进行校对/改进语言清晰度。

- 4. We declare that we have used GenAI to brainstorm ideas (e.g., app concept/features/user stories).
- 5. We declare that we have used GenAI to help draft or refine requirements/user stories (including MoSCoW).
- 6. We declare that we have used GenAI to help identify relevant WCAG 2.2 success criteria for the accessibility slide.
- 7. We declare that we have used GenAI to help generate or refine diagrams (architecture / ER / sitemap / wireframes).
- 8. We declare that we have used GenAI in another way (briefly explain).

5. How to submit

Your Design Specification must be saved as a PDF document. One member of the team should submit the pdf document via the “Design Specification” submission icon on the Moodle page of the course. The person making the submission will be required to complete a **Declaration of Originality** on behalf of all team members when submitting via Moodle. If you have used any external sources, **including GenAI**, be sure to acknowledge them in your submission.

6. Useful resources

See this guide for developing wireframes:
<http://webdesign.tutsplus.com/articles/a-beginners-guide-to-wireframing--webdesign-7399>

There are a number of applications that might be helpful when it comes to creating your system architecture diagram, ER diagram and wireframes, including <http://www.draw.io>.

Although you are not asked to include this explicitly in your presentation, you may find it useful to think around user personas and user scenarios, to lay out the requirements of your web application. Here are some resources, with examples of user scenarios, which you can consult:
<https://www.justinmind.com/blog/how-to-design-user-scenarios/>
<https://ieeexplore.ieee.org/stamp/stamp.jsp?tp=&arnumber=1290485>

Finally, accessibility is an important aspect in the design of the information architecture. You may find these web user stories from W3C useful in understanding web application accessibility:
<https://www.w3.org/WAI/people-use-web/user-stories/>

7. Marking scheme

Your design specification will be assessed using the following mark breakdown:

Component and description of what is sought	Marks
Overview Contains sufficient detail so that the reader can understand what web app is supposed to do for the user.	2
Specification The user stories should be clear, specific, and appropriately prioritised, so it is evident what the app will do for its intended users and how it will deliver that value.	5
System architecture diagram	2

- 4. We 声明 that we have used 使用生成式AI 进行头脑风暴 想法 (例如, app 概念/功能/用户故事)。
- 5. 我们声明, 我们已使用生成式AI来帮助起草或完善需求/用户故事 (包括MoSCoW)。
- 6. 我们声明, 已使用 GenAI 协助识别与无障碍性幻灯片相关的 WCAG 2.2 成功标准。
- 7. 我们声明, 已使用 GenAI 协助生成或完善图表 (架构图 / ER 图 / 网站地图 / 线框图)。
- 8. 我们声明, 已以其他方式使用 GenAI (简要说明)。

5. 如何提交

您的《设计规范》必须保存为 PDF 文档。团队中应有一名成员通过课程 Moodle 页面上的“设计规范”提交图标提交该 PDF 文档。通过 Moodle 提交时, 提交人将代表所有团队成员完成一份《原创性声明》。如果您使用了任何外部资源, 包括 GenAI, 请务必在提交中注明。

6. 有用资源

看看这个 g 开发者指南 ping 线框图:
<http://webdesign.tutsplus.com/articles/a-beginners-guide-to-wireframing--webdesign-7399>

在创建系统架构图、ER图和线框图时, 有一些应用程序可能会很有帮助, 包括 <http://www.draw.io>。

虽然不要求你在演示中明确包含这一点, 但思考用户角色和用户场景, 以规划你的Web应用程序的需求, 可能会很有用。这里有一些资源, 你可以参考, 其中包含用户场景的示例:
<https://www.justinmind.com/blog/%E5%A6%82%E4%BD%95%E8%AE%BE%E8%AE%A1%E7%94%A8%E6%88%B7%E6%96%B9%E6%A1%88/>
<https://ieeexplore.ieee.org/stamp/stamp.jsp?tp=&arnumber=1290485>

最后, 无障碍性是信息架构设计中一个重要的方面。您可能会发现 W3C 提供的这些网络用户故事对理解网络应用程序的无障碍性很有用:
<https://www.w3.org/WAI/people-use-web/user-stories/>

7. 评分标准

您的desi gn sp规范将被我们评估 g 如下 g 分数明细:

组件及其描述, 即所寻求的内容	评分标准
概述 包含足够详细的信息, 以便读者能够理解该网络应用旨在为用户做什么。	2
规范 用户故事应当清晰、具体, 并合理排序, 以便明确该应用将为预期用户做什么以及如何传递其价值。	5
系统架构图	2

This high-level diagram should include the different components of the system and in particular any additional APIs that might be used.	
ER Diagram The model should be relevant and appropriate in the context of the specification. The diagram should adhere to compressed Chen notation.	8
Site Map This should make it clear how the different templates that make up the app are linked together.	4
Wireframes The wireframes should include the main functionality of the web app. There should be a sufficient number to illustrate the functionality provided by the app as indicated by the specification.	4
Accessibility plan The plan should be clear on which WCAG 2.2 success criteria have been selected and what each one implies for the design of the proposed application.	4
Presentation The design specification should be well-structured, clearly written and aesthetically pleasing.	1
Total	30

The total mark will be converted to a band which will be the team’s mark for this component of the assessment.

此高层图表应包含系统的不同组件，并特别说明可能使用的任何附加API。	
ER图 该模型应在规范上下文中相关且适当。图表应遵循压缩的Chen符号。	8
站点地图 这应清晰展示构成应用的不同模板之间的链接方式。	4
线框图 线框图应包含Web应用的主要功能。应有足够数量的线框图，以说明规范中指示的应用功能。	4
无障碍性计划 该计划应明确说明已选择哪些WCAG 2.2成功标准，以及每个标准对拟议应用设计的影响。	4
演示 设计规范应结构清晰、文字简洁、美观。	1
总计	30

总分数将被转换为一段分数，这将作为团队在此评估组件中的得分。
